

# Ke station report (2024-04-06 - 2024-10-03)

Total number of Ke sessions found in database for this time range: 39  
Total number of Ke observations across all sessions in this time range: 35911  
Median station W.RMS over period: 51.10 ps  
Median station 'Performance' (used/scheduled) over period: 0.554

# Reported issues (as extracted from correlation reports)

R41151: Minused out. Data not available yet. Will include in future release.  
R41153: ; Spurious unprocessed data between 21:00 and 05:33. Data issue, multistream file sizes differ.; Did not apply any suspected pol-swaps. Can include in second pass if incomplete data becomes availabl  
R11156: Experiment started late due to LBA, E sampler showing errors; Observed with dual linear polarisation X,Y; Minused out: (start) 2024-141-170000 -- 2024-141-203648;  
VO4143: Antenna connection issues from 144-0218 to 144-0340, data not: correlated. Etransfer stopped before full data was collected,; missed scans 143-2046 to 144-0000. Channels k,C removed from; fringe fitting due to large phase residuals.  
R11160: Minused out: (start) 2024-169-170000 -- 2024-170-023125 Late start 02:37; ; Polarization swap applied S band  
VO4192: Weak/non-existant phasecal  
AUA114: ; Late start: 1903UT; Some data loss due to recording issues results in lower sensitivity  
R41164: Minused out: 2024-201-034523 -- 2024-201-125523;  
R41165: Minused out. Data not received yet, left out of first pass.
